**SECTION 1: IDENTIFICATION**

Product name : Insulin Porcine Formulation

Other means of identification : CANINSULIN (A007401)  
CANINSULIN INSULIN FOR DOGS AND CATS (37255)  
CANINSULIN VETPEN INSULIN FOR DOGS AND CATS (65973)

**Manufacturer or supplier's details**

Company : Intervet Australia Pty Limited (trading as MSD Animal Health)

Address : 91-105 Harpin Street  
Bendigo 3550, Victoria Australia

Telephone : 1 800 033 461

Emergency telephone number : Poisons Information Centre: Phone 13 11 26

E-mail address : EHSDATASTEWARD@msd.com

**Recommended use of the chemical and restrictions on use**

Recommended use : Veterinary product

Restrictions on use : Not applicable

**SECTION 2. HAZARDS IDENTIFICATION****GHS Classification**

Not a hazardous substance or mixture.

**GHS label elements**

No hazard pictogram, no signal word, no hazard statement(s), no precautionary statement(s) required.

**Other hazards which do not result in classification**

None known.

**SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS**

Substance / Mixture : Mixture

**Components**

| Chemical name                                  | CAS-No.    | Concentration (% w/w) |
|------------------------------------------------|------------|-----------------------|
| Insulin (ox), 8A-l-threonine-10A-l-isoleucine- | 12584-58-6 | < 10                  |

**SECTION 4. FIRST AID MEASURES**

**Insulin Porcine Formulation**

|         |                |             |                                 |

|                                                             |   |                                                                                                                         |
|-------------------------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------|
| If inhaled                                                  | : | If inhaled, remove to fresh air.<br>Get medical attention if symptoms occur.                                            |
| In case of skin contact                                     | : | Wash with water and soap as a precaution.<br>Get medical attention if symptoms occur.                                   |
| In case of eye contact                                      | : | Flush eyes with water as a precaution.<br>Get medical attention if irritation develops and persists.                    |
| If swallowed                                                | : | If swallowed, DO NOT induce vomiting.<br>Get medical attention if symptoms occur.<br>Rinse mouth thoroughly with water. |
| Most important symptoms and effects, both acute and delayed | : | None known.                                                                                                             |
| Protection of first-aiders                                  | : | No special precautions are necessary for first aid responders.                                                          |
| Notes to physician                                          | : | Treat symptomatically and supportively.                                                                                 |

---

**SECTION 5. FIREFIGHTING MEASURES**

|                                               |   |                                                                                                                                                                                                                                                 |
|-----------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                  | : | Water spray<br>Alcohol-resistant foam<br>Carbon dioxide (CO <sub>2</sub> )<br>Dry chemical                                                                                                                                                      |
| Unsuitable extinguishing media                | : | None known.                                                                                                                                                                                                                                     |
| Specific hazards during fire-fighting         | : | Exposure to combustion products may be a hazard to health.                                                                                                                                                                                      |
| Hazardous combustion products                 | : | No hazardous combustion products are known                                                                                                                                                                                                      |
| Specific extinguishing methods                | : | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.<br>Use water spray to cool unopened containers.<br>Remove undamaged containers from fire area if it is safe to do so.<br>Evacuate area. |
| Special protective equipment for firefighters | : | Wear self-contained breathing apparatus for firefighting if necessary.<br>Use personal protective equipment.                                                                                                                                    |

---

**SECTION 6. ACCIDENTAL RELEASE MEASURES**

|                                                                     |   |                                                                                                                                                                         |
|---------------------------------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions, protective equipment and emergency procedures | : | Follow safe handling advice (see section 7) and personal protective equipment recommendations (see section 8).                                                          |
| Environmental precautions                                           | : | Avoid release to the environment.<br>Prevent further leakage or spillage if safe to do so.<br>Prevent spreading over a wide area (e.g. by containment or oil barriers). |

---

**Insulin Porcine Formulation**

|         |                |             |                                 |
|---------|----------------|-------------|---------------------------------|
| Version | Revision Date: | SDS Number: | Date of last issue: 28.09.2024  |
| 3.0     | 16.06.2025     | 27383-00026 | Date of first issue: 03.11.2014 |

Retain and dispose of contaminated wash water.  
Local authorities should be advised if significant spillages cannot be contained.

Methods and materials for containment and cleaning up : Soak up with inert absorbent material.  
For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent.  
Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable.  
Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

**SECTION 7. HANDLING AND STORAGE**

Technical measures : See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.

Local/Total ventilation : Use only with adequate ventilation.

Advice on safe handling : Handle in accordance with good industrial hygiene and safety practice, based on the results of the workplace exposure assessment  
Take care to prevent spills, waste and minimize release to the environment.

Hygiene measures : If exposure to chemical is likely during typical use, provide eye flushing systems and safety showers close to the working place.  
When using do not eat, drink or smoke.  
Wash contaminated clothing before re-use.  
The effective operation of a facility should include review of engineering controls, proper personal protective equipment, appropriate degowning and decontamination procedures, industrial hygiene monitoring, medical surveillance and the use of administrative controls.

Conditions for safe storage : Keep in properly labelled containers.  
Store in accordance with the particular national regulations.

Materials to avoid : Do not store with the following product types:  
Strong oxidizing agents

**SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION****Components with workplace control parameters**

| Components                    | CAS-No.    | Value type<br>(Form of exposure) | Control parameters / Permissible concentration | Basis    |
|-------------------------------|------------|----------------------------------|------------------------------------------------|----------|
| Insulin (ox), 8A-I-threonine- | 12584-58-6 | TWA                              | 3 µg/m3 (OEB 4)                                | Internal |

## Insulin Porcine Formulation

|         |                |             |                                 |

11 10A-I-isoleucine-

**Engineering measures** : Use appropriate engineering controls and manufacturing technologies to control airborne concentrations (e.g., drip-less quick connections).  
All engineering controls should be implemented by facility design and operated in accordance with GMP principles to protect products, workers, and the environment.  
Containment technologies suitable for controlling compounds are required to control at source and to prevent migration of the compound to uncontrolled areas (e.g., open-face containment devices).  
Minimize open handling.

**Personal protective equipment**

Respiratory protection : No personal respiratory protective equipment normally required.

Hand protection

Material : Chemical-resistant gloves

Remarks : Consider double gloving.

Eye protection : Wear safety glasses with side shields or goggles.  
If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles.  
Wear a faceshield or other full face protection if there is a potential for direct contact to the face with dusts, mists, or aerosols.

Skin and body protection : Work uniform or laboratory coat.  
Additional body garments should be used based upon the task being performed (e.g., sleevelets, apron, gauntlets, disposable suits) to avoid exposed skin surfaces.  
Use appropriate degowning techniques to remove potentially contaminated clothing.

**SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES**

Appearance : suspension

Colour : off-white

Odour : odourless

Odour Threshold : No data available

pH : 7 - 7.8

Melting point/freezing point : No data available

Initial boiling point and boiling range : 100 °C

Incompatible materials : Oxidizing agents  
Hazardous decomposition products : No hazardous decomposition products are known.

**SECTION 11. TOXICOLOGICAL INFORMATION**

Exposure routes : Inhalation  
Skin contact  
Ingestion  
Eye contact

**Acute toxicity**

Not classified based on available information.

**Components:**

**Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

Acute toxicity (other routes of administration) : LD50 (Rat): > 36 mg/kg

**Skin corrosion/irritation**

Not classified based on available information.

**Components:**

**Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

Remarks : No data available

**Serious eye damage/eye irritation**

Not classified based on available information.

**Components:**

**Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

Remarks : No data available

**Respiratory or skin sensitisation****Skin sensitisation**

Not classified based on available information.

**Respiratory sensitisation**

Not classified based on available information.

**Chronic toxicity****Germ cell mutagenicity**

Not classified based on available information.

**Components:**

**Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

Genotoxicity in vitro : Test Type: Bacterial reverse mutation assay (AMES)

| Germ cell mutagenicity - Assessment | : Weight of evidence does not support classification as a germ cell mutagen.                                                                     |

**Carcinogenicity**

Not classified based on available information.

**Components:****Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

|                   |                |
|-------------------|----------------|
| Species           | : Rat          |
| Application Route | : Subcutaneous |
| Exposure time     | : 2 Years      |
| LOAEL             | : 180 µg/kg    |

|                              |                                                                      |
|------------------------------|----------------------------------------------------------------------|
| Carcinogenicity - Assessment | : Weight of evidence does not support classification as a carcinogen |
|------------------------------|----------------------------------------------------------------------|

**Reproductive toxicity**

Not classified based on available information.

**Components:****Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

|                      |                                                                                                                                                                                                                                                                                 |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Effects on fertility | : Test Type: Fertility/early embryonic development<br>Species: Rat<br>Application Route: Intraperitoneal<br>Fertility: NOAEL Mating/Fertility: 360 µg/kg<br>Symptoms: No effects on fertility<br>Result: No effects on fertility and early embryonic development were detected. |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**STOT - single exposure**

Not classified based on available information.

**STOT - repeated exposure**

Not classified based on available information.

## Insulin Porcine Formulation

**Repeated dose toxicity****Components:****Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

|                   |                |
|-------------------|----------------|
| Species           | : Rat          |
|                   | : 5.8 mg/kg    |
| Application Route | : Inhalation   |
| Exposure time     | : 6 Months     |
| Symptoms          | : Hypoglycemia |

|                   |                |
|-------------------|----------------|
| Species           | : Monkey       |
|                   | : 0.64 mg/kg   |
| Application Route | : Inhalation   |
| Exposure time     | : 6 Months     |
| Symptoms          | : Hypoglycemia |

|                   |                |
|-------------------|----------------|
| Species           | : Rat          |
| NOAEL             | : 0.085 mg/kg  |
| Application Route | : Subcutaneous |
| Exposure time     | : 1 Months     |

|                   |                |
|-------------------|----------------|
| Species           | : Dog          |
| NOAEL             | : 0.07 mg/kg   |
| Application Route | : Subcutaneous |
| Exposure time     | : 1 Months     |

**Aspiration toxicity**

Not classified based on available information.

**Experience with human exposure****Components:****Insulin (ox), 8A-I-threonine-10A-I-isoleucine-:**

|            |                                                                                                                                                           |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation | : Symptoms: Hypoglycemia, Fatigue, Drowsiness, Sweating, Headache, Nausea, Palpitation, tingling, numbness, altered mental status, Breathing difficulties |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|

**SECTION 15. REGULATORY INFORMATION****Safety, health and environmental regulations/legislation specific for the substance or mixture**

Therapeutic Goods (Poisons : Schedule 4  
Standard) Instrument

Prohibition/Licensing Requirements : There is no applicable prohibition, authorisation and restricted use requirements, including for carcinogens referred to in Schedule 10 of the model WHS Act and Regulations.

**The components of this product are reported in the following inventories:**

AICS : not determined

DSL : not determined

IECSC : not determined

---

**SECTION 16: ANY OTHER RELEVANT INFORMATION****Further information**

Revision Date : 16.06.2025

Sources of key data used to compile the Safety Data Sheet : Internal technical data, data from raw material SDSs, OECD eChem Portal search results and European Chemicals Agency, <http://echa.europa.eu/>

Items where changes have been made to the previous version are highlighted in the body of this document by two vertical lines.

Date format : dd.mm.yyyy
