+1-908-423-6000

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Skin corrosion, Category 1 Serious eye damage, Category 1 Reproductive toxicity, Category 2

Specific target organ toxicity - repeated exposure, Category 1 Long-term (chronic) aquatic hazard, Category 3

2.2 Label elements

H314: Causes severe skin burns and eye damage. H318: Causes serious eye damage. H361: Suspected of damaging fertility or the unborn child. H372: Causes damage to organs through prolonged or repeated exposure. H412: Harmful to aquatic life with long lasting effects.

Rinse skin with water or ely call a POISON CENTER/ doctor. B38 + P310 IF IN EYES: Rinse cautiously eral minutes. Remove contact lenses, if predo. Continue rinsing. Immediately call a R/ doctor.

Hazardous components which must be listed on the label:

Amprolium

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

May form explosive dust-air mixture during processing, handling or other means.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Components

	Special for firefi	protective equipment ghters	:	In the event of fire Use personal prot	e, wear self-contained breathing apparatus. ective equipment.
	Specific ods	c extinguishing meth-	:	cumstances and t Use water spray t	measures that are appropriate to local cir- he surrounding environment. o cool unopened containers. ged containers from fire area if it is safe to do

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Use personal protective equipment. Follow safe handling advice (see section 7) and personal tective equipment recommendations (see section 8).
--

6.2 Environmental precautions

: Avoid release to the environment.
Prevent further leakage or spillage if safe to do so.
Retain and dispose of contaminated wash water.
Local authorities should be advised if significant spillages
cannot be contained.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up	:	Sweep up or vacuum up spillage and collect in suitable con- tainer for disposal.
		Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
		Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are re-
		leased into the atmosphere in sufficient concentration.
		Local or national regulations may apply to releases and dis- posal of this material, as well as those materials and items

Version 3.0	Revision Date: 06.07.2024	SDS Number: 10858221-00005	Date of last issue: 30.04.2024 Date of first issue: 30.09.2022

7.3 Specific end use(s)

Specific use(s)

: No data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form	Control parameters	Basis
		of exposure)		
Amprolium	121-25-5	TWA	40 ug/m3 (OEB 3)	Internal
	Further information: DSEN			
		Wipe limit	140 ug/100cm2	Internal

8.2 Exposure controls

Engineering measures

All engineering controls should be implemented by facility design and operated in accordance with GMP principles to protect products, workers, and the environment.

Containment technologies suitable for controlling compounds are required to control at source and to prevent migration of the compound to uncontrolled areas (e.g., open-face containment devices).

Minimize open handling.

Personal protective equipment						
Eye/face protection	: Wear safety glasses with side shields or goggles. If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles. Wear a faceshield or other full face protection if there is a potential for direct contact to the face with dusts, mists, or aerosols.					
Hand protection						
Material	: Chemical-resistant gloves					
Remarks Skin and body protection	 Consider double gloving. Work uniform or laboratory coat. Additional body garments should be used based upon the tas being performed (e.g., sleevelets, apron, gauntlets, disposabl suits) to avoid exposed skin surfaces. Use appropriate degowning techniques to remove potentially contaminated elething. 	le				
Respiratory protection Filter type	 contaminated clothing. If adequate local exhaust ventilation is not available or exposure assessment demonstrates exposures outside the recommended guidelines, use respiratory protection. Particulates type (P)

SECTION	N 13: Disposal consi	der	ations	
12 1 Weet	te treatment methods			
Produ		:		ordance with local regulations. European Waste Catalogue, Waste Codes

Product	 Dispose of in accordance with local regulations. According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user, preferably in discussion with the waste disposal authorities. Do not dispose of waste into sewer.
Contaminated packaging	 Empty containers should be taken to an approved waste han- dling site for recycling or disposal. If not otherwise specified: Dispose of as unused product.

5	Skin Corr. 1	H314	Based on product data or assessment			
E	Eye Dam. 1	H318	Based on product data or assessment			
F	Repr. 2	H361	Calculation method			
5	STOT RE 1	H372	Calculation method			
ŀ	Aquatic Chronic 3	H412	Calculation method			

Items where changes have been made to the previous version are highlighted in the body of this document by two vertical lines.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and shall not be considered a warranty or quality specification of any type. The information provided relates only to the specific material identified at the top of this SDS and may not be valid when the SDS material is used in combination with any other materials or in any process, unless specified in the text. Material users should review the information and recommendations in the specific context of their intended manner of handling, use, processing and storage, including an assessment of the appropriateness of the SDS material in the user's end product, if applicable.
