## 2. HAZARDS IDENTIFICATION

Manufacture, Storage and Import of Hazardous Chemicals Rules 1989

## Classification

Not classified as hazardous according to criteria laid down in Part I of Schedule-1.

## GHS Classification

Reproductive toxicity : Category 1B

## GHS label elements

Hazard pictograms

Signal word

Hazard statements

Precautionary statements
: Danger
:

: H360FD May damage fertility. May damage the unborn child.

- Prevention:

P203 Obtain, read and follow all safety instructions before use. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

## Response:

P318 IF exposed or concerned, get medical advice.

## Storage:

P405 Store locked up.
Disposal:
P501 Dispose of contents/ container to an approved waste disposal plant.

Other hazards which do not result in classification
None known.

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture : Mixture
Components

| Chemical name | CAS-No. | Concentration (\% <br> $w / w)$ |
| :--- | :--- | :---: |
| Boric acid | $10043-35-3$ | $>=2.5-<5$ |

4. FIRST AID MEASURES

General advice

If inhaled
In case of skin contact

In case of eye contact
If swallowed

Most important symptoms and effects, both acute and delayed
Protection of first-aiders

Notes to physician
: In the case of accident or if you feel unwell, seek medical advice immediately.
When symptoms persist or in all cases of doubt seek medical advice.
: If inhaled, remove to fresh air.
Get medical attention.
: In case of contact, immediately flush skin with soap and plenty of water.
Remove contaminated clothing and shoes.
Get medical attention.
Wash clothing before reuse.
Thoroughly clean shoes before reuse.
: Flush eyes with water as a precaution. Get medical attention if irritation develops and persists.
: If swallowed, DO NOT induce vomiting. Get medical attention.
Rinse mouth thoroughly with water.
: May damage fertility. May damage the unborn child.
: First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists (see section 8).
: Treat symptomatically and supportively.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protec- : Use personal protective equipment. tive equipment and emergency procedures

Environmental precautions

Methods and materials for
containment and cleaning up
: Soak up with inert absorbent material.
For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container.
Clean up remaining materials from spill with suitable absorbent.
Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable.
Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

## Engineering measures

: Use appropriate engineering controls and manufacturing technologies to control airborne concentrations (e.g., drip-less quick connections).
All engineering controls should be implemented by facility design and operated in accordance with GMP principles to protect products, workers, and the environment.
Containment technologies suitable for controlling compounds are required to control at source and to prevent migration of the compound to uncontrolled areas (e.g., open-face containment devices).
Minimize open handling.

## Personal protective equipment

Respiratory protection : If adequate local exhaust ventilation is not available or expo-

Filter type
Hand protection
Material : Chemical-resistant gloves
Remarks : Consider double gloving.
Eye protection : Wear safety glasses with side shields or goggles. If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles.
Wear a faceshield or other full face protection if there is a potential for direct contact to the face with dusts, mists, or aerosols.
Skin and body protection : Work uniform or laboratory coat.
Additional body garments should be used based upon the task being performed (e.g., sleevelets, apron, gauntlets, disposable suits) to avoid exposed skin surfaces. Use appropriate degowning techniques to remove potentially contaminated clothing.
Hygiene measures : If exposure to chemical is likely during typical use, provide eye flushing systems and safety showers close to the working place.
When using do not eat, drink or smoke.
Wash contaminated clothing before re-use.
The effective operation of a facility should include review of engineering controls, proper personal protective equipment, appropriate degowning and decontamination procedures, industrial hygiene monitoring, medical surveillance and the use of administrative controls.
