Section 2: Hazard identification

Classification of th	ne substance	or mixture
----------------------	--------------	------------

Reproductive toxicity	: Category 1B
	. oalogoly ib

GHS Label elements, including precautionary statements

Hazard pictograms	:	
Signal word	:	Danger
Hazard statements	:	H360FD May damage fertility. May damage the unborn child.
Precautionary statements	:	Prevention: P201 Obtain special instructions before use. P202 Do not handle until all safety precautions have been read and understood. P280 Wear protective gloves/ protective clothing/ eye protec- tion/ face protection/ hearing protection.
		Response: P308 + P313 IF exposed or concerned: Get medical advice/

VersionRevision Date:SDS Number:Date of last issue: 30.09.20236.006.04.20246300141-00010Date of first issue: 02.09.2020

attention.

Storage: P405 Store locked up.

Disposal:

P501 Dispose of contents/ container to an approved waste disposal plant.

Other hazards which do not result in classification

None known.

Section 3: Composition/information on ingredients

Substance / Mixture	:	Mixture
---------------------	---	---------

Components

Chemical name	CAS-No.	Concentration (% w/w)
Boric acid	10043-35-3	>= 1 -< 10
4-Chloro-3-methylphenol	59-50-7	>= 0.1 -< 0.25

Section 4: First-aid measures

Description of necessary first-aid measures					
General advice		In the case of accident or if you feel unwell, seek medical ad- vice immediately. When symptoms persist or in all cases of doubt seek medical advice.			
If inhaled	:	If inhaled, remove to fresh air. Get medical attention.			
In case of skin contact		In case of contact, immediately flush skin with soap and plenty of water. Remove contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.			
In case of eye contact	:	Flush eyes with water as a precaution. Get medical attention if irritation develops and persists.			
If swallowed		If swallowed, DO NOT induce vomiting. Get medical attention. Rinse mouth thoroughly with water.			
Most important symptoms a	and	effects, both acute and delayed			
Risks Protection of first-aiders	:	May damage fertility. May damage the unborn child. First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists (see section 8).			
Indication of any immediate	me	edical attention and special treatment needed			
Treatment	:	Treat symptomatically and supportively.			

Version	Revisi
6.0	06.04.

vision Date: .04.2024 SDS Number: 6300141-00010

Date of last issue: 30.09.2023 Date of first issue: 02.09.2020

Section 5: Fire-fighting measures

Extinguishing media		
Suitable extinguishing media	:	Water spray Alcohol-resistant foam Carbon dioxide (CO2) Dry chemical
Unsuitable extinguishing media	:	None known.
Special hazards arising from	n th	e substance or mixture
Specific hazards during fire-	:	Exposure to combustion products may be a hazard to health.
fighting		

Special protective equipment for firefighters Specific extinguishing meth- ods		In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment. Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so. Evacuate area.
---	--	---

Section 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions	: Use personal protective equipment. Follow safe handling advice (see section 7) and personal pro- tective equipment recommendations (see section 8).
Environmental precautions	
Environmental precautions	 Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.
Methods and materials for contai Methods for cleaning up	nment and cleaning up : Soak up with inert absorbent material.

Version 6.0	Revision Date: 06.04.2024	SDS Number: 6300141-00010	Date of last issue: 30.09.2023 Date of first issue: 02.09.2020	
		bent. Local or nationa posal of this ma	ning materials from spill with suitable absor- al regulations may apply to releases and dis- aterial, as well as those materials and items e cleanup of releases. You will need to deter-	
		mine which regulations are applicable. Sections 13 and 15 of this SDS provide information regard certain local or national requirements.		

Section 7: Handling and storage

Precautions for safe handling	
Technical measures :	See Engineering measures under EXPOSURE
Local/Total ventilation :	CONTROLS/PERSONAL PROTECTION section.
	If sufficient ventilation is unavailable, use with local exhaust ventilation.
Advice on safe handling :	
	Do not breathe vapours or spray mist. Do not swallow.
	Avoid contact with eyes.
	Handle in accordance with good industrial hygiene and safety
	practice, based on the results of the workplace exposure as- sessment
	Keep container tightly closed.
	Take care to prevent spills, waste and minimize release to the
	environment. If exposure to chemical is likely during typical use, provide eye
Hygiene measures :	flushing systems and safety showers close to the working
	place.
	When using do not eat, drink or smoke. Wash contaminated clothing before re-use.
	The effective operation of a facility should include review of
	engineering controls, proper personal protective equipment,
	appropriate degowning and decontamination procedures,
	industrial hygiene monitoring, medical surveillance and the use of administrative controls.
Conditions for safe storage, in	cluding any incompatibilities
Conditions for safe storage :	Keep in properly labelled containers.
conditions for sure storage	Store locked up.
	Keep tightly closed.
Materials to avoid :	Store in accordance with the particular national regulations. Do not store with the following product types:
	Strong oxidizing agents

Version	Revision Date:	SDS Num

Section 8: Exposure controls/personal protection

Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parame- ters / Permissible concentration	Basis
Boric acid	10043-35-3	TWA (Inhal- able particu- late matter)	2 mg/m3 (Borate)	ACGIH
		STEL (Inhal- able particu- late matter)	6 mg/m3 (Borate)	ACGIH
4-Chloro-3-methylphenol	59-50-7	TWA	200 µg/m3 (OEB 2)	Internal
		Wipe limit	100 µg/100 cm2	Internal

Appropriate engineering : control measures	Use appropriate engineering controls and manufacturing technologies to control airborne concentrations (e.g., drip- less quick connections). All engineering controls should be implemented by facility design and operated in accordance with GMP principles to protect products, workers, and the environment. Containment technologies suitable for controlling compounds are required to control at source and to prevent migration of the compound to uncontrolled areas (e.g., open-face con- tainment devices). Minimize open handling.
Individual protection measures	s, such as personal protective equipment (PPE)
Eye/face protection :	Wear safety glasses with side shields or goggles. If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles. Wear a faceshield or other full face protection if there is a potential for direct contact to the face with dusts, mists, or aerosols.
Skin protection :	Work uniform or laboratory coat. Additional body garments should be used based upon the task being performed (e.g., sleevelets, apron, gauntlets, dis- posable suits) to avoid exposed skin surfaces. Use appropriate degowning techniques to remove potentially contaminated clothing.
Respiratory protection :	If adequate local exhaust ventilation is not available or expo- sure assessment demonstrates exposures outside the rec- ommended guidelines, use respiratory protection.
Filter type : Hand protection	Particulates type
